PROJECT

MOVIE RECOMMENDER SYSTEM

Mar - 2024

- The recommendation system analyzes the past preferences of the user concerned, and then it uses this information to try to find similar movies.
- Information on users' past behavior (e.g., viewing history, ratings) is crucial for personalizing recommendations.
- movie recommender systems play a pivotal role in the way users discover and consume entertainment content, leveraging complex algorithms to provide personalized movie suggestions.

QUIZ WEBSITE

Jan- 2024

- Allows users or administrators to create quizzes with different types of questions (multiple choice, true/false, short answer, etc.).
- Offers an engaging and user-friendly interface for participants to take quizzes and receive immediate feedback.
- Assists in learning and revision by providing a dynamic way to assess knowledge and understanding.

STUDENT MANAGEMENT SYSTEM

jan - 2024

- A Student Management System (SMS) is a comprehensive software platform designed to facilitate the management of student-related information and processes in educational institutions.
- Reduces administrative burden and paperwork, allowing staff to focus on more strategic tasks
- Empowers institutions with data analytics and reporting tools to make informed decisions.
